

Connectotel welcomes announcement of the successor to Novell BorderManager

30 March 2010 - UK - Connectotel, a provider of leading filtering solutions for Novell BorderManager, today welcomed the announcement of the successor to the Novell BorderManager proxy product.

The SuperLumin proxy provides Novell customers with a SUSE Linux Enterprise-based, high-performance proxy cache and can be purchased via Novell sales and account teams worldwide. BorderManager continues to be supported by Novell through to March 2012, giving customers time to move to the new platform.

Marcus Williamson of Connectotel comments:

"We are pleased for Novell and for our customers that the future successor for BorderManager has been announced. We are currently working together with Novell and SuperLumin to bring our LinkWall Suite solution to Novell/SuperLumin customers.

Connectotel is unique in the field as the only vendor actively developing and selling on-box filtering solutions for BorderManager and now for its successor, SuperLumin."

Connectotel customers with active Annual Support and Maintenance (ASM) for the LinkWall Suite will be entitled to migrate to the new "LinkWall for SuperLumin" version, when available.

The full text of the announcement, made last week at Novell's BrainShare conference, can be found here:
